INCORPORATION OF REVIEW COMMENTS INTO 200-BP-1 OPERABLE UNIT RI/FS WORK PLAN

Attached is a copy of the "Review Comment Record (RCR)" containing disposition of review comments for the subject Work Plan. Per our agreement, we will further explain or provide those sections which have been added, amplified, or rewritten if you so request. Because of the milestone for formal transmittal of the revised document to EPA and Ecology by February 28, 1989, we would appreciate your review of the disposition response in a timely fashion. The Work Plan is to be revised to the disposition comment and any changes resulting from your review. As we previously discussed, we recommend that HQ provide a formal acknowledgement of the acceptability of the Work Plan, subject to incorporation of any additional comments, without another submittal and review of the final document. Copies of the revised Work Plan as it is to be submitted to EPA and Ecology will be provided to HQ for information.

Please call me on FTS 444-7167 or John Broderick on 444-4197 if you have any questions regarding the 200-BP-1 Work Plan.
